Employment Summary

- Working as a Software Engineer at Aktrix Technologies PVT LTD Hyderabad.

PROJECT : Payroll

Client : Sopa Lodges - Africa

Team Size : 8

Duration : January-2022 to till date.

Technologies : HTML, JAVA, SQL, Bootstrap, jQuery, JavaScript

Tool : Visual Studio Code, Eclipse.

Description:

It is a web based project developed for payroll calculation with payroll, loan, leave and reports modules, govt. Reports; tax calculations etc. By using this, an organization can pay their payrolls without any manual calculations. Leave management module also there with this, employees can apply for leave, admin people will approve that then he will get the leave.

All the calculations regarding leaves are done by this system. Employee can apply for a loan. The admin people will check his history and they will approve or cancel that loan. If they approve that loan then every month automatically his instalment amount will be deducted from his salary. With this an organization can pay salaries in multi-currency. Payroll management system provides dynamic creation of branches departments and taking the new employee details dynamically.

Responsibilities:

- Designed UI with HTML5, CSS3, java-script, Bootstrap.
- Forms Validations using Html and Angular.
- Implemented routing using angular and bootstrap.
- Used Bootstrap to make the application user-friendly in the development of the Navigation bars, Tables, Sliders, Calendars.
- Processed JSON response data by consuming RESTFUL web services and used jQuery filter for implementing search results.
- Implementing Auto Complete/Auto Suggest functionality using Ajax, jQuery and JSON.
- Developed Application to asses JSON and XML from Restful web service from consumer side using jQuery
- Developed design documents and provided estimates for the client requirements
- Developed the presentation model popup layer using AJAX.
