PROJECTS

Builder's manager

USED SOFTWARE:

JDK-1.8.0,MYSQL-5.7,NETBEANS-8.0.2(IDE).

The proposed project "**Builder's Manager**" helps the builder to manage their all different kinds of job provided by him to the client. The main aim of Builders to hire / purchase the site and then build the buildings, apartments ,malls and hospitals etc.This software perfectly help to solve all the above described problems which are being faced by builder. I will use database and backend to store all kind of records for future references.
