- build a ecommerce website using mern stack
- <https://github.com/deepaksingh87/ecommerce-project>

ACHIEVEMENTS

Video Calling Project (10/2021 - 03/2022)

VIDEO CALLING PROJECT:-I worked on video calling project like skype where we use stomp for transferring file between them. During this project I learnt about socket.io, WEB RTC which is used for video and streaming. Basically it is the Project which is used for video calling, transfer message, screen sharing etc. The Frontend of the project written in React.js and uses different react library such as moment.js, Prime React, Material UI, React Router Dom etc.

CLIENT PROJECT (03/2022 - 07/2022)

I am currently work on Client project where we used React.js as a frontend and uses different Javascript library. it is the project for managing tender and it has different module and everyone get differently functionality by user id. The modules are admin, seller, buyer and login according that module.
