PROJECTS

Advance e-commerce

- **Front end : Html,Css,bootstrap, Js/ajax**
- **Back end : PHP , Laravel(MVC Framework) and MySQL**
- eCommerce is short for electronic commerce, as in online commerce. It's an umbrella term for any transaction done over the internet. eCommerce includes retail stores, such as clothing and other physical products.

WORK EXPERIENCE

Full stack developer

Freelance

02/2022 - Present

Belgaum, India

I started learning this framework and I did 6 months course in udemy and learned many things and worked on major projects like ecom , crm management system on fitnesses industry . And then later I started working as freelance and did some major projects using Laravel bootstrap jquery MySQL such as advanced e-commerce applications, billing system , and many complex web projects. And also i used to learn wordpress.
