PROJECT PROFILE

1. SHOE SHOPPING APP : 01 JUNE 2021 TO 05 AUG 2021

Platform & Skills: JAVA,XML,SQLITE

Brief: This is a shopping application here you can buy new shoe. The online shopping application displays shoes, both new and used, for all brands. Customers can add in a brand they wish for, and they are notified as it appears on the Appcation

2. JAVA TEST :10 JULY 2019 TO 15 AUG 2019

Platform & Skills: JAVA, XML, MYSQL

Brief: This project is made with the help of java and MYSQL .This project helps to check their java practicals and also see all the questions which is going trending on websites

3. Go Easy Learning App(Tycathon 2021):10 MAY 2021 TO AUG 2021

Platform & Skills: JAVA, XML, SQLITE

Brief: This game will help kids to have fun with learning. In this game, there will different levels of learning such as good/bad habits (for example- while playing the game there will be a section in the game where garbage will be spread in the garden and if the kid put that garbage and throw it in the dustbin he will get bonus points with stars and similarly if he missed any good habits he will sad emoji and his star will deduct) and we can take more real world examples like planting trees, avoid wastage of water, helping friends and many more. We can also add parents corner in this game in which if the kid is practicing these habits in his own life also then his parents will mark yes in the parents corner and after that kid will get special rewards that will help him completing different levels in the games... This is basically a values gainer and learning game for kids and we can promote this app in schools
