ACADEMIC PROJECTS:

- -Study Project- "FABRICATED OF AIR ENGINE"
- -Project Description:
We selected "FABRICATION OF AIR ENGINE" which utilizes the pressurized air instead of fuel. In this project, a single cylinder two stroke engine is used. The spark plug is removed from the engine head and through this opening the pressurized air passed.The pressurized air come from the compressor to the engine through a 3/2 way directional controlled solenoid operated valve. This valve is controlled by a electronic control system.
