

SHUBHAM GARG (Female)

Frontend Developer

Projects

2022-07 Grid Fully Responsive Website Layout

- Multi-purpose **responsive** website using **grid properties** viz. nav-link, sections, images, footer.
- **Media queries** are used to apply **CSS** on different media sizes to render screen accordingly.

2022-07 Food and Beverages Store

- An online restaurant portal with a **navbar for navigation** and a **homepage** for restaurant details.
- Homepage has a background cover image with a **linear gradient effect** and another image on top of it by using position property.
- **Hover effect** is used for colour change of all the buttons.
- **JavaScript** is used for sliding-transition of top products with a view more button for listing.
- Restaurant order related details like Free home delivery, return policy, Refund, etc. are shown by using cards.
- To show case new products, restaurant can use **blog section** which contains product image with its details.
- **Google maps** is used to show the **restaurant's location** alongside contact details.
- All social media links are show-cased in footer section using **awesome icons**.
- **Fully Responsive** using media queries.
- **Z-index** is used for side **navigation bar** in mobile view.

2022-06 University Website

- A **fully Responsive** University website with a **navbar** consists of **hover effect** navigation links. Navigation links contains about, courses, blog, and contact us.
- University personnel can create blogs on **blog section** and on which users can also **post comments**.
- On Courses page courses are shown on cards with a **hover shadow effect**.
- Campus photo gallery is also shown at home page and hovering over them shows the city name of that campus.
- Home page also contains University **facilities section** like library, playground and cafeteria along with **Students reviews section**.
- User can **send message** using contact page and also can see the University **locations using Google maps**.
- All social media links are show-cased in footer section using **awesome icons**.

2022-06 Signup/Login Form

- A Sign up/ Login form with a **transform-3d rotational effect**.
- **Validation for Email and empty field** is also used in both of the login and signup form.
- **Transition** between sign up and log in form occurs with a **Y-axis 180-degree rotation**.
- Concepts- **JavaScript, CSS-transition, transform-3d(rotate), back-face visibility, perspective**.
