EXPERIENCE

Java Full Stack Developer, Internship
Syntrino

Hyderabad
Jan, 2022 to Jul, 2022

E-Card Web Application

E-Commerce Web Application. The product will provide platform for several individuals and companies to sell their products. The application is intended to be small and resource efficient. Application will implement all of the CRUD operations on database with strict constrictions to DRY principle. The goal of our application is to provide a quick and easy to use interfaces for all users.

Home Loan

The system increases customer retention and simplifies loan and EMI management. Project is designed to be used by any individual for home loan, customers can view available services, policies, benefits and other information related to a specific loan. The system collects the required information about the individual and then verifies if they satisfy the eligibility criteria based on which the loan gets approved or rejected.

Airline Reservation Application

The system is standalone in nature. It is designed to provide functionalities like booking of tickets in which a user should be able to apply for tickets of any flight and of any class. A limitation is imposed when the number of tickets for which user apply is greater than available seats or no seats are available. If seats are not available, then put user transaction in the waiting queue. If the tickets are available, then it is issued to the user and it must be updated in the database concurrently.
