A Capable Web & RPA Developer who can create responsive websites and Robots for automation. Goods hands on knowledge on UIPath. Can build well automated bot for automation.

EDUCATION

JULY 2022
BACHELOR OF ENGINEERING, SAMPOORNA INSTITUTE OF TECHNOLOGY AND RESEARCH, CHANNAPATNA - 562160
Got 7.2 CGPA.

MARCH 2018
INTERMEDIATE OF SCIENCE, M.U.Z SAIN COLLEGE
Got 58 % marks.

March 2016
SECONDARY SCHOOL CERTIFICATE, HIMALAYAN PUBLIC SCHOOL
Got 9.8 CGPA.

SKILLS

- Experience in PDF, Email, Excel, Website Automations
- Good knowledge on Selectors of UIPath
- Basic knowledge of C#, VB Script
- App Proficiency : VS Code, Visual studio code, UIpath studio.
- Problem Solving
- Programing Skills : C, Python, RPA developer, Web developer, Bootstrap.
- Computer proficiency
- Leadership Experience

PROJECTS

ASTER (Attentional Scene Text Recognization with Full Rectifier)

- It is an AI & ML based application.
- which recognize the irregular and blur text and convert into suitable text.
- In this project I have used python language and the libraries are numpy, pandas and pytorch, Jupyter Notebook.

WEB LEAF NOW

- It is an Internship Project**.**
- We made an E - Commerce website where we can sell or donate the plants or trees.
- For that we used HTML, CSS, JS and BOOTSTRAP.
- Basically we made only front part.
- It contains Header, Footer and Body Part.

RPA PROJECTS :

1. Covid – 19 Report Generator

   - It is an Covid – 19 Report Generator project where I assigned the robot to extract the data from website and store them in excel file and then send to specific person.
   - I used so many activities like Read Range, Open Browser, Data Scraping etc.
   - I have used UIpath Studio for that project.

2. Web Scraping

   - Created a bot where it extracts the data from E – Commerce website and stores in the given Excel File
   - Mainly I used Data Scraping method and some activities.

3. Birthday Reminder

   - In this Project the user will give the DOB as a Input. And the bot will determine whether today is the birthday of user or not .
   - If the date matches then through message box bot will wish the user.

4. Dynamic Selector

   - Made a project where bot will read the data from excel file which is states name.
   - According to states it will search through the browser and get the CM's name and store in the same excel file.
   - Used UI Explorer and some activities.

ACTIVITIES

Recently I started learning RPA development and got some skills how to create Robots for automation, and also I got certification of RPA Developer Foundation from UIPath Academy,

after that I also got certificate of Web Development from Coursera, and I learned Python language through Udemy and got certificate of completion. I also like to do Video Editing I have my youtube channel where I have putted my edited videos there.

CERTIFICATIONS

- RPA Developer Foundation from *UIPath Academy.*

- Full Stack Web Developer from *John Hopkins University* powered by *Coursera.*

- The Python Mega Course from *UDEMY.*

HOBBIES

- Video Editing

- Playing Video Game

- Love Singing

- Travelling

- Watching Movies & Web Series
