PREDICTION AND DIAGNOSIS REVIEW SYSTEM FOR COVID-19 USING MACHINE LEARNING (Main Project)
Java Technology using Machine Learning Algorithm
Using machine learning (ML) have caused a paradigm shift in healthcare that can be used for decision support and forecasting by exploring medical data. Recent studies have shown that ML can be used to fight COVID-19. The objective of this article is to summarize the recent ML-based studies that have addressed the pandemic.

03/2022 – 03/2022	**COVID-19 Tracking Web Application (Mini Project)**
	HTML , CSS , JavaScript
	This data can benefit a wide audience. Researchers utilize the data to track virus outbreaks. Hospitals and first responders may also use the data to prepare and request additional resources and supplies to treat affected areas. Top medical professionals have used data to examine which populations suffer from COVID-19 the most and identify infection trends.

Courses
