Current Address: C/O– Akshaya Gitanjali Kumar
Sahoo, City - Soro, District - Balesore, State -
Odisha, Pin Code – 756045

My family background info and some other quick info about me:

Father Name: Akshaya Kumar Sahoo

Mother Name: Gitanjali Sahoo

My Father is retired government employee and my mother is a lecturer in political science in semi government college named as kudei women's college in soro city. My parents living in a small city named as soro which is situated in District Balesore and District Balesore coming under State Odisha which is a small state situated inside in our Country India. Odisha state situated in east side of our country India. My Father was working in account department in National Textile Corporation in Bhubaneswar and Bhubaneswar is the capital of State Odisha. My father retired on 2016. Soro pin code is 756045.

We are three siblings, that is, my elder sister, my younger brother, and me.

My elder sister's name is Jayashree sahoo and got married in 2016 and living in Bangalore.

My younger brother is doing MCA in Gandhi institute of technology, Bhubaneswar, Odisha.

My Date of birth: 10 Jan 1994

My Current location is soro and I am very much comfortable with virtual interview because due to financial issue I can't come to office for only interview. If I get selected through virtual interview and get offer letter and ticket from company then I will relocate to the particular company location immediately. I am looking for rhel Linux system administrator or engineer profile and aws infrastructure architecture profile job in any location in India and outside of the India. Currently I am not working anywhere. My last company name is Minutus Computing and my last working date is 26 Feb 2022 and my last company location is pune, Maharashtra and my last drawn salary is 30,000 in hand and ctc is 3.5 lpa and my last company work mode is wfh (work from home). Currently I am staying in my home town soro. If company expect from me to do work from home, then company have to give laptop and internet to me to do work from home. My current salary is 0lpa and my last company salary is 3.5lpa and my expected salary is totally depending on my interview performance.

I have done B. TECH with 75% in electronics and telecommunication branch in Satyasai engineering college, Balesore, Odisha in 2014 under Biju Patnaik university.

I have done +2 science with 51% in shaheed mahavidyalaya in 2010, village - Barapur, district - Bhadrak (Bhadrak is a small district situated inside Odisha state), state - Odisha.

I have done 10th in Odia and English medium (mix) with 49% in Bhanjahari high school in 2008, village - Thala, district - Balesore, state - Odisha.

I have 3.7 years of experience in various company and in various designation. my relevant experience also 3.7 years.

I have only 10 days of experience in trainee Linux system administrator profile in yukthi system private limited.

I have only 1 months of experience in infrastructure or devops engineer in Minutus computing.

Please check below know more about me and my professional experience:

Objective

To achieve a career with an organization wherein I can utilize my skills and experiences to the maximum, in a role that offers greater challenges and opportunities for learning and development. Am an eager learner, good team player, and have an ability to cope up with the Industrial needs and requirements.

Training and certifications

Completed training on Red Hat Enterprise **Linux (RHEL)** and Amazon web services **(AWS)** from Apponix Technologies Bangalore within 8 months (1st May 2021 – 31st December 2021).

Linux RHEL 7:

- Hands on experience and good understanding of Linux operating system (OS) structure and Linux OS commands.

- Locate, read, and use system documentation including man, info, and files in /usr/share/doc and getting familiar with VI editor shortcuts and features.

- Archive, compress, unpack, and uncompressing files using tar, star, gzip, and bzip2 and task scheduling using 'at' and 'cron'.

- List, set, change and assign standard ugo/rwx permissions.

- Installing Linux OS using ISO image, upgrading kernel using Yum.

- Configuring IP addresses on the system and understanding DNS and GATEWAY.

- Working on establishing network connections by creating multiple servers using Linux GUI and CLI and accessing remote systems using SSH.

- Understanding of Network services such as DNS, NFS, SSH and NTP and Configuring IP addresses on the system and establishing secure connection to servers.

- Configuring NFS server and client and enabling auto mounting using 'fstab'.

- Shell scripting basics with understanding features of bash.

Networking:

- Understanding Network basics related to connections, IP address types, network classes with ranges.

- Understanding parts of the network and devices present in the network like switches, routers with functions of Domain Name Service (DNS), Gateway, Dynamic Host Configuration Protocol (DHCP) and Network Address Translation (NAT) in a Network.

- Assigning IP addresses depending upon the hosts requirements.

- IP subnetting calculation and knowing how masking works.

- Designing a network with required hosts by creating sub-netting and identifying components like Network ID, Broadcast ID, subnet mask, CIDR and VPC.

AWS:

- Understanding of cloud automation and infrastructure and deployment of cloud in an enterprise.

- Navigating with AWS management console and implementing the services such as EC2, VPC, S3, lamp, snowball, CloudFormation, CloudFront, CloudTrail, CloudWatch, IAM user management, Route53.

- Differentiating AWS Storage options and create an Amazon Simple Storage Service (S3) bucket.

- Recognizing AWS Compute and Networking options and use Amazon Elastic Compute Cloud (EC2) and Amazon Elastic Block Storage (EBS).
- Identifying Deployment and Management options.
- Exploring scaling options such as Load balance and Auto-Scale with EC2.
- Use EC2 APIs.
- Implementing a Web server in an Amazon Linux/Windows Instance and configure the firewall to access a Web server.
